2021 MODEL YEAR F-150 TRAILER BRAKE CONTROLLER

REVISION	UPDATE	REVISION DATE
Q-330R1	Updated Text	09 /March/2021
Q-330	INITIAL RELEASE	25 / FEB/ 2021

MODEL(S) AFFECTED:

2021 MODEL YEAR F-150 (INCLUDING RAPTOR)

ISSUE / DESCRIPTION:

Early 2021 model year F-150's are not equipped with provisions to install an aftermarket trailer brake controller. If you wish to utilize a trailer brake controller, see the dealer to have a Ford Integrated Trailer Brake Controller installed. Ford expects the ability to add an Aftermarket Trailer Brake Controller to an F-150 vehicle will be available on vehicles built on or after August 2021.

An SSM has been released to all Ford dealers

SSM 49624**SSM Text:**

A new Ford Genuine Accessory trailer brake controller (TBC) kit that is compatible with only 2021 F-150 vehicles equipped with trailer tow package (53A) or class IV trailer hitch (53B) with a 4/7 pin connector is now available. The Ford Diagnosis and Repair System (FDRS) has been updated to include the application for trailer tow enabling. The installation and FDRS trailer tow enabling instructions are web based only and can be found on: PTS > Workshop > Accessories > Genuine Products > Electrical / '(2021-CMY) F150 Trailer Brake Control Module Installation'.

Refer to the Body Builder Layout Book for additional guidelines and recommendations. If you have any questions, please contact the [Ford Body Builders Advisory Service](#) as shown in the header of this bulletin.
